

# Carlos Floriano Hlade

Junior Software Developer

## CONTACT

**Phone:** +39 3758508156

**Email:** carlos.hlade@gmail.com

**Address:** Villa San Faustino 41 (PG)

**GitHub:** [www.github.com/carlosflorianohlade](https://www.github.com/carlosflorianohlade)

## PROFESSIONAL EXPERIENCE

### Software Developer Intern (Erasmus+ Traineeship) | June 2022

Garmo Instruments (Zaragoza, Spain)

- Developed and optimized Graphical User Interfaces (GUI) in **Java** to manage and control laser welding sensors via tablet environment.
- Built the local web interface for the sensors using pure **JavaScript** and HTML/CSS.
- Programmed client-side scripts to extract, format, and download diagnostic data and system logs (.txt, .csv) directly from the sensor.
- Managed the deployment of web files to the sensor's local environment via **FTP** clients.

## PROJECTS

### AI Puzzle Solver | Python, Keras, OpenCV, TensorFlow

- Built an AI solver for the Uniform Coloring domain. Implemented a Convolutional Neural Network (CNN) for grid image recognition and the A\* search algorithm for path optimization.

### Text-Based RPG Game | C

- Developed a terminal-based dungeon crawler inspired by board games. Programmed turn-based game logic, state management, and dynamic memory allocation using procedural programming.

## EDUCATION

### Bachelor of Science in Computer Science | 2023–Present

University of Perugia (UNIPG)

- **GPA:** 27/30
- **Relevant Coursework:** Algorithms and Data Structures, Procedural and Object-Oriented Programming, Databases, Artificial Intelligence.
- **Expected Graduation:** February 2027.

### High School Diploma in Computer Science | 2018–2023

Istituto Tecnico Tecnologico Allievi Sangallo, Terni (Italy)

- **Final Grade:** 90/100

## TECHNICAL SKILLS

- **Languages:** Java, Python, C, C++, JavaScript, SQL, HTML/CSS, LaTeX
- **Frameworks/Libraries:** Spring Boot, Bootstrap, Keras, NumPy, TensorFlow, OpenCV, PostgreSQL
- **Developer Tools:** Git/GitHub, Linux CLI, Docker
